

SPSM
Pharmaceutical
OBEISANCE TO HUMANITY

ISO 9001:2015 & WHO GMP Certified Company

SURGICAL PRODUCT

COMPANY PROFILE

SPSM Pharmaceutical is one of the renowned and foremost Pharma companies in India, based in Vadodara, Gujarat. We are extensively engaged in marketing and import-export business of pharmaceutical and other associated healthcare in Indian as well as global market.

High quality and customer satisfaction is our utmost priority, thus we are continuously putting our best to identifying our patrons needs and delivering the excellent quality end products which perfectly match with their business requirements.

Since our commencement, we are enjoying the reputation of most efficient, honest and reliable firm as we are constantly bringing the innovative, superior quality, effective and affordable products for our clients.

We can supply products with private packing and brand name as required by client.

We are persistently working with aim to enhance our reputation in health sector and at a same time spreading our wings in the global marketplace.

Comprehensive Product Range

1. Latex Examination Powdered Gloves
2. Latex Examination Chlorinated Powder-Free Gloves
3. Latex Examination Polymer Coated Powder-Free Gloves
4. Latex Surgical Gloves
5. Nitrile Surgical Gloves
6. Nitrile Examination Gloves
7. Polymer Coated Nitrile Gloves
8. Vinyl Examination Gloves
9. Household Gloves
10. Industrial Gloves
11. 12" Long Length High Risk Gloves
12. Coloured Gloves (Latex/Nitrile)
13. Flavoured (mint) Gloves
14. CPE Gloves (Clear / Blue)
15. TPE Gloves (Clear / Blue)

SURGICAL GLOVES

Powdered & Powder-free

- ❖ Extra strength provides protection from surgical debris
- ❖ Fully anatomical design to reduce hand fatigue
- ❖ Softness provides superior comfort and natural fit
- ❖ Micro-roughened surface provides excellent wet and dry grip
- ❖ Beaded cuff makes donning easy and helps prevent roll back
- ❖ High strength and elasticity

Product Specifications

Type :

Powdered or Powder-free; Gamma ray or EtO sterilized

Material :

Natural high quality latex

Design & Features :

Hand Specific; curved fingers; beaded cuff; natural to white, off-white to yellow (Powder-Free); textured surface

Storage :

The Gloves shall maintain their properties when stored in a dry condition at temperature not higher than 30° C.

Shelf-life :

5 years from date of manufacturing

Glove Size :

5.5, 6.0, 6.5, 7.0, 7.5, 8.0, 8.5, 9.0

NITRILE GLOVES

Powdered & Powder-free

- ❖ Protection from unwanted or dangerous substances
- ❖ Beaded cuff ensures easy donning and prevent from rolling
- ❖ Superior strength with better puncture resistance
- ❖ Full textured enhances wet and dry grip
- ❖ Fit with thinner gauge to improve tactile sensitivity
- ❖ Custom design enhances comfort and fit
- ❖ Provide an alternative solution for individuals who are allergic to natural rubber latex

Product Specifications

Type:

Powdered or Powder-free; non-sterile

material :

Synthetic Nitrile Latex

Design & Features :

(Polymer Coated or Online Chlorinated)

Ambidextrous; finger textured and textured; beaded cuff; natural white or coloured (white / blue / green / pink / light purple / black / red / orange / apple green)

Storage:

The gloves shall maintain their properties when stored in a dry condition at temperature not higher than 30° C.

Shelf-life :

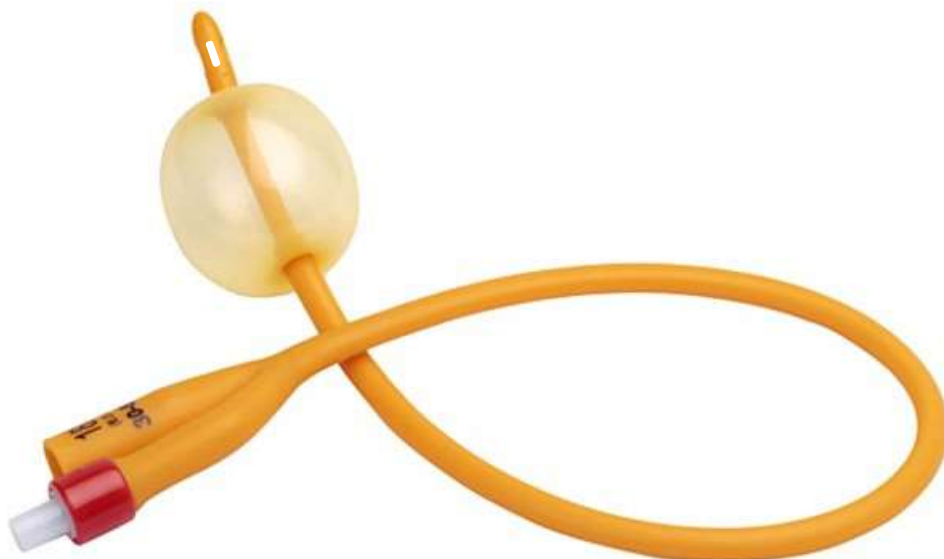

5 years from the date of manufacturing

Glove Size :

Extra small, small, Medium, Large, Extra-Large

FOLEY BALLOON CATHETER

SIZES

FR	COLOUR CODE
6	BROWN
8	BLACK
10	GRAY
12	WHITE
14	GREEN
16	ORANGE
18	RED
20	YELLOW
22	VIOLET
24	BLUE
26	PINK

PACKING

Sterile, Individually Paper pack
Inner box of 10 PCS.,
Master carton of 1000 Pcs.

TWO WAY FF-FC-301	
Size in FR	Baloon Capacity
6	1.5 ml
8,10	3 - 5 ml
12,14	15 ml,30-50 ml
16-26	30 ml,30-50 ml

THREE WAY FF-FC-302	
Size in FR	Baloon Capacity
12 -24	30 ml,30-50 ml

FEMALE CATHETER FF-FC-310	
Size in FR	Baloon Capacity
12-24	15 ml,15-30 ml

Optimal Eyes

Smooth, optimal eyes ensuring atraumatic introduction and effective drainage.

Pressure resistant balloon

Ultra thin highly elastic balloon Easily inflated or deflated for maximum patient safety.

Large drainage lumen

For fast and effective drainage Round channel that minimizes encrustation and clogging.

Strong drainage funnel

Kink resistance and Provides best connection to drainage bag.

Inflation Valve

Choice of Hard or Soft non-return Valve for trouble free inflation & deflation of balloon.

Siliconized Catheters

Silicone fluid surface results in smooth Finish for easy passage through the urethral meatus. Designed for short and long term urinary drainage.

SILICONE FOLEY BALLOON CATHETER

FF-FC-304

- Silicone foley catheter is a thin, Sterile tube inserted into the bladder to drain urine from the body.
- The device is developed using 100% medical grade silicone and have good biological compatibility.
- Smooth tapered rounded tip of catheter facilitates easy introduction of the device into the urethra.
- The drainage eyes are accurately formed to allow effective drainage.
- The symmetrical balloon expands equally in all directions to execute its function of retaining bladder efficiently.
- Colour coded sleeves are useful for easy size identification,
- Size : 8 10 12 14 16 18 20 22 24

URETHRAL RED RUBBER CATHETER

FF-FC-311

- Made from natural MR grade PV Latex Rubber
- Designed for short term urinary drainage in the patients.
- Available with Round hollow tip with smooth optimal Eye.
- Urethral Red Rubber Catheter is manufactured with integral tapered funnel end.
- E. T. O. Sterile and Pyrogen Free / Individually packed.
- Size : 8 10 12 14 16 18 20 22 24

MALE EXTERNAL CATHETER

FF-ME-306

- Manufactured from pure Latex for soft and Gentle feel.
- Penis Sheath / External provided with self adhesive coated strip for proper fixation on to penis.
- Proximal end is designed for easy connection to urine bag / leg bag making it simple to use.
- Individually packed and ready for use.
- E. T. O. sterile and pyrogen free.
- Size : Ex-Small (20 mm), Small (25 mm), Medium (30 mm), Large (35 mm), Ex-Large (40 mm)

NELATON CATHETER

FF-NC-303

- Manufactured from Non-toxic, Non-irritant, Medical grade PVC.
- Frozen surface tubing for super smooth incubation.
- A Traumatic, Soft, Rounded, Closed tip with two lateral eyes for efficient drainage.
- X-ray opaque line provided throughout the length of catheter and colour coded plain connector doe easy identification of size.
- Universal funnel shape connector for easy connection to urine bag.
- E. T. O. sterile and pyrogen free / individually packed
- Size : 8 10 12 14 16 18 20 22 24

RECTAL CATHETER

FF-RC-307

- Designed for introduction of enema solution into rectum to release /aspire rectal fluid.
- Manufactured from soft non toxic, non irritant.
- Kink resistant medical grade PVC tube.
- Proximal end is provided with funnel shape connector for easy connection to the suction equipment.
- A traumatic, soft, rounded closed tip with two lateral eyes for efficient drainage.
- Colour coded plain connector for easy identification of size.
- Available with the option of radio opaque line throughout the length for X-ray visualization.
- Sterile / Disposable / Individual packed.
- Size : 18 20 22 24 26 28 30 32

URINE COLLECTION BAG WITH BOTTOM OUTLET

FF-OU-103

- Available with hanging and carrying facilities using molded hanger or hanger stick with string.
- Capacity : 2000 ml approx.

URINE COLLECTION BAG WITH TOP OUTLET

FF-OU-101, 102, 103

URINE COLLECTION BAG FOR PAEDIATRIC

FF-OU-104

GENERAL FEATURES

- Manufactured from clinical grade PVC sheet.
- Suitable for closed drainage systems for short and long term use
- Efficient non return valve to prevent the back flow of urine.
- Smooth and kink resistant 90 to 100 cm long connecting PVC Tube with grooved tapered connector for easy connection.
- Precise graduation in ml to indicate the quantity of urine collection .

- Available with specially design hook facilities for carrying, handling and holding the tube inn upright position.
- Capacity : 2000 ml approx.

- For short term urine collection of neonates.
- Provided with hypoallergenic self-adhesive for better grip, prevent irritation and easy removal from skin of the infant.
- Capacity : 100 ml Approx.

URINE COLLECTION BAG WITH MEASURED VOLUME METER

FF-OU-106

URINE COLLECTION LEG BAG WITH BOTTOM OUTLET

FF-OU-109

- Designed for accurate measurement for hourly urine out put during examination of patient.
- Completely closed circuit eliminates the risk of contamination.
- Measured volume meter directly attached to urine bag with overflow facility and convenience to empty the measured volume meter in the bag.
- Push / Pull bottom outlet is provided for easy and emptying of urine bag.
- Capacity : 2000 ml approx.
- Capacity of volume meter :250 ml

- Suitable for day and night use during incontinence.
- Provides freedom of mobility as the bag is attached to the leg of the patient.
- Extra ordinary leg strap connectors strategically placed for more comfortable wear.
- Provided T-type bottom outlet valve.
- Capacity : 800 ml Approx.

GIBBON'S CATHETER

FF-GC-308

- Designed for long term urine drainage.
- Manufactured from soft non toxic, non irritant Kink resistant medical grade PVC tube.
- Compatible with catheter lubrication.
- Provided with X-ray opaque line through its length.
- Size : 10 12 14 16 18 20

URINE POT (TWO IN ONE)

FF-OU-107

- 2 in 1 urine pot for male and female both.
- Easy fit cover for hygiene and odorless.
- Easy carry handle.
- Can be stored in standing or lying position.
- Disposable and individually packed.
- 1000 ml capacity with graduation mark.
- **Also available Male Urine Pot.**

BED PAN

FF-OC-108

- A bedpan is used for both urinary and fecal discharge of bedridden patient.
- Easy fit cover for hygiene and odorless.
- Our bedpan comes in attractive designs made to be more comfortable and practical than traditional ones.
- It is made from tough, high grade plastic and is ergonomically designed for utmost human comfort, durable for repeated use, easy to clean and store and suitable for children and adults.
- Disposable / Individually Packed.

URINE CULTURE BOTTLE

FF-CB-832

- Specially designed for collection of urine sample for culture test.
- Made from medical grade Polypropylene.
- Absolutely leak proof.
- Sterile / Disposable.
- Size : 30 ml, 50 ml
- **Also available Urine Container.**

TUR SET

FF-TS-114

- 'Y' shaped set design for endoscopic irrigation during trans urethral resection of prostate gland.
- Thumb operated clamps helps quick and change of bottles.
- Proximal end with flexible latex tubing for easy connection to endoscope.
- E. T. O. Sterilized, Non Toxic, Pyrogen free.

INFUSION & TRANSFUSION

I. V. INFUSION SET

Airvent

Y-connector

Micro Drip

GENERAL FEATURE

- Constitute extra strong & sharp spike with Clear, Transparent and Flexible drip chamber with disc filter facilitates visualization.
- Suitable for administration of Infusion Fluid for medical therapy.
- Efficient roller controller for accurate and unrestricted flow.
- Super smooth kink resistant PVC tubing with standard length of 1500 mm for easy visualization of flow.
- Sterile / Disposable / Individual packed.
- EO Sterile, Non-Toxic and Pyrogen free.

OPTIONS AVAILABLE

- Air vented or non vented spike.
- With or without needle.
- 'Y' connector (Latex or Latex free)
- Latex or Latex free
- Needle free Y-site.
- Luer lock or luer slip.
- Flow regulator integrated into infusion set.
- PVC / DEHP free kink resistant set.
- With customized tube length more than 1500 mm.

PRODUCT CODE	SPECIFICATION	INDIVIDUAL PACKING	FLOW RATE
FF-IS-401	Small Molded Drip Chamber 21G Needle, Tube Dia: 2.7 mm, Plain Latex.	Poly Pack	20 Drops/ml
FF-IS-402	Medium Molded Drip Chamber 21G Needle, Tube Dia: 2.7 mm, Plain Latex.	Poly Pack	20 Drops/ml
FF-IS-402 PRIMIUM	Big Molded Drip Chamber 21G Needle, Tube Dia: 3.00 mm, Bulb Latex.	Poly Pack	20 Drops/ml
FF-IS-403	Big Vented Drip Chamber "Y" Connector with luer lock 21G Needle, Tube Dia: 3.00 mm.	Paper Pack	20 Drops/ml
FF-IS-405	Micro Drip big Chamber 23G Needle, Tube Dia: 3.00 mm, Bulb Latex.	Paper Pack Poly Pack	60 Drops/ml
FF-IS-405A	Micro Drip big Vented Chamber 23G Needle, Tube Dia: 3.00 mm, Bulb Latex.	Paper Pack Poly Pack	60 Drops/ml
FF-IS-407	Medium Molded Drip Chamber 21G Needle, Tube Dia: 2.7 mm, Plain Latex.	Paper Pack	20 Drops/ml
FF-IS-407 PINK	Medium Molded Drip Chamber 21G Needle, Tube Dia: 3.0 mm, Bulb Latex.	Paper Pack	20 Drops/ml
FF-IS-408	Vented Big Drip Chamber 21G Needle, Tube Dia: 3.0 mm, Bulb Latex.	Paper Pack	20 Drops/ml
FF-IS-419	Big Molded Drip Chamber 21G Needle, Tube Dia: 3.00 mm, Bulb Latex.	Ribbon Pack	20 Drops/ml
FF-IS-420	Big Vented Drip Chamber "Y" Connector with luer lock 21G Needle, Tube Dia: 3.00 mm.	Ribbon Pack	20 Drops/ml

INFUSION & TRANSFUSION

I. V. FLOW REGULATOR

FF-IS-404

- Designed to control the flow rate of IV Fluids with range of 5 to 250 ml/hr manually.
- With 'Y' connectors injection site for extra medication.
- Constant flow rate.
- E.T.O. Sterile, Non-Toxic and Pyrogen free.

THREE WAY STOP COCK

FF-WS-414

- Designed to incorporate between infusion line and vein puncture device for additional infusion.
- Fully transparent body made of medical grade polycarbonate allows visualization of flow of fluids.
- Available with Blue and Red pegs for arterial and venous line identification.
- Inside is completely smooth and available with molded lure lock.
- E.T.O. Sterile and Pyrogen free.

THREE WAY STOP COCK WITH EXTENSION LINE

FF-WS-415

- Designed to minimize the movement at cannulation site by taking administration site away from the insertion site.
- Fitted with 3 way stop cock at one end and male lure lock for safe and secure connection at the other end.
- Soft frosted and kink resistant PVC tubing.
- Extension tube length : 5-250 cms, I.D. : 3.0 mm and O.D. : 4.1 mm
- Also available with 'Y' injection Port (Latex or Latex free)
- Sterile / Disposable / Individual packed.

HIGH PRESSURE MONITORING LINE

FF-WS-416

- Designed to arterial blood pressure monitoring.
- Soft, Clear, Flexible, 100% leak proof and No blockage tubing.
- Fitted with male and female lure locks for secure connection.
- Sterile, Non-Toxic and Pyrogen free.
- Tube Length : 25-250 Cms.
- Extension Tube : I.D. - 1.5 mm, O.D. - 3.0 mm.

LOW PRESSURE EXTENSION LINE

FF-LPE-417

- Designed to make administration of fluids more convenient and suitable for low pressure applications.
- Fitted with male and female lure locks for secure connection.
- Tube Length : 25-250 Cms.
- Extension Tube : I.D. - 3.0 mm, O.D. - 4.1 mm

INFUSION & TRANSFUSION

INTRAVENOUS CANNULA

FF-IV-418

- For infusion of intravenous fluids and medicines.
- Smooth, sharp needle for easy penetration.
- Flexible wide wings for proper fixation.
- Injection port for extra medication.
- Transparent flash back chamber to check back flow of blood.
- PTFE / FEP teflon catheter to minimize trauma to the patient colour coded by size for easy identification.
- Available with needs of different gauge size.
- Sterile / Disposable / Individual Blister Packed / Printed Box Packing.
- Size : G-14 G-16 G-18 G-20 G-22 G-24 G-26

SCALP VEIN SET

FF-SV-413, 414

- Designed to provide rapid venous access, for patient comfort during long infusion.
- Silconized and thin walled high quality imported needle for atraumatic insertion.
- Colour coded butterfly shaped wings for easy handling and better fixation.
- Super smooth kink resistant tube.
- Sterile / Disposable / Individual Blister Packed / Poly pack.
- Size : 18 19 20 21 22 23 24 25

BLOOD ADMINISTRATION SET

FF-BT-410

- For transfusion of blood and blood components.
- Clear, Transparent and Flexible drip chamber facilitates visualization.
- Sharp spike for batter penetration.
- Specially designed roller clamp for better flow control.
- Superior quality and self sealing Latex Tubing / Latex or Latex free flash bulb for easy flushing.
- Super smooth kink resistant PVC tubing with standard length of 150 cms.
- Approx. 200 micro blood filter and 15 G hypodermic needle.
- Approximately 20 drops / ml.
- Non-Toxic , Pyrogen free & Sterile by EO.
- Available single or Double drip chamber.

MEASURED VOLUME BURETTE SET

FF-MV-42

- Suitable for infusion of measured quantities of fluid.
- Clear, Soft, Cylindrical & Calibrated measured volume chamber with marking for precise fluid administration.
- Efficient roller controller for better flow control.
- Soft and Kink resident tube.
- Specially beveled strong and sharp spike for smooth and better penetration.
- Bulb Latex or Tube Latex for easy Flushing.
- Automatic floating shut off valve to prevent aor embolism and indicate fluid level.
- Approximately 60 drops / ml.
- Size : 110 ml and 150 ml.
- Needle Size : 23 G.

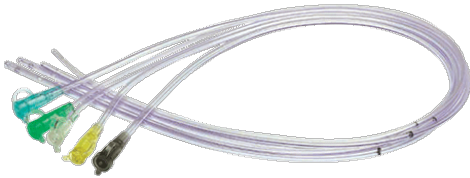

AVAILABLE OPTIONS

- Air vented or non vented spike
- With or without needle
- 'Y' connectors (Latex or Latex free)
- Lure lock or Luer slip
- DEHP free with customized tube length.

GASTROENTEROLOGY

INFANT FEEDING TUBE

FF-IF-501, 502

- Suitable for neonates and pediatric nutritional feeding.
- Manufactured from Non Toxic, Non Irritant PVC to delicate mucosa.
- Distal end is coned with two lateral eyes for efficient drainage.
- Proximal end is fitted with female luer mount for easy connection to feeding funnel or syringe.
- Low friction tubing and smooth tip ensures trauma free intubation.
- Radio-opaque line is provided through out its length for X-ray visualization.
- Sterile / Disposable / Individual packed.
- Size : 5 6 7 8 9 10

RYLE'S TUBE

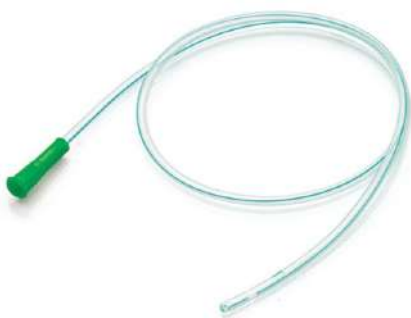

FF-RT-503

- Manufactured from Non Toxic, Non Irritant PVC.
- Specially designed for nasogastric introduction for nutrition and aspiration of intestinal secretion.
- Distal end is coned with corrosion resistant plastic balls sealed into the tube to assist the passage of the tubing during incubation.
- For lateral eyes are provided for efficient aspiration and administration.
- The tube is marked at 50 cm, 60 cm and 70 cm from the tip for accurate placement.
- Provided with X-ray opaque line throughout the length.
- Sterile / Disposable / Individual packed.
- Length : 105 Cms.
- Available with colour coded clouser connector for easy identification of size.
- Size : 8 10 12 14 16 18 20 22 24

STOMACH TUBE

FF-ST-505

- Designed for nasogastric introduction of nutrition and aspiration of intestinal secretion.
- Low friction Medical grade PVC reduces the incidences of nasal discharges.
- Radio opaque line through out its length helps checking the position radio logically.
- Proximal end is provided with universal funnel shape connector.
- Marked at 50 cm, 60 cm and 70 cm from the tip for accurate placement.
- Sterile / Disposable / Individual packed.
- Size : 8 10 12 14 16 18 20

LEVIN'S TUBE

FF-LT-504

- Designed for Gastro-intestinal feeding and aspiration of intestinal secretion.
- Low friction Medical grade PVC reduces the incidences of nasal discharges.
- Tube with Radio-opaque line marked at 44, 55, 65 and 75 Cms from the tip for accurate placement.
- Distal end is coned with four lateral eyes fro efficient drainage.
- Proximal end is provided with universal funnel shape connector.
- Sterile / Disposable / Individual pacjed.
- Length : 125 Cms.
- Size : 8 10 12 14 16 18 20

ANAESTHESIA & RESPIRATORY CARE

URETHRAL CATHETER

FF-UC-305

- Manufactured from Non Toxic, Non Irritant PVC tube.
- Most suitable for removal of secretion from mouth, trachea and bronchial tubes.
- Proximal end is fitted with (Universal) funnel shape connector for connection to standard suction equipment for accurate placement.
- Funnel shape connectors are colour coded for size identification.
- Provided with X-ray opaque line throughout its length.
- Sterile / Disposable / Individual packed.
- Size : 8 10 12 14 16 18 20

SUCTION CATHETER

FF-SC-601 Plain with Universal Funnel Shape Connector

FF-SC-608 With T Type Vacuum control valve for Thumb control

- Manufactured from Non Toxic, Non Irritant PVC tube.
- Designed for removal of secretion from mouth, trachea and bronchial tubes.
- Frozen surface tubing for smooth intubation.
- Colour coded connector for easy size identification.
- Sterile / Disposable / Individual packed.
- Size :

8 10 12 14 16 18 20

ENDOTRACHEAL TUBE (PLAIN)

FF-ET-602

ENDOTRACHEAL TUBE (CUFFED)

FF-ET-603

- Pilot balloon with integral one way valve to ensure one way air flow.
- High volume, Low pressure evenly shaped cuff with a pilot balloon integrated with the tube for secure positioning inside the trachea.

GENERAL FEATURE

- Designed to secure the airway and maintain the gas exchange in the lungs by inserting in to the trachea through the oral / nasal cavity.
- Manufactured from special Non-toxic, Clear, Transparent, Thermo sensitivity Siliconized PVC Medical to protect delicate mucosa tissues and readily conforms to the body contour.
- Proximal end fitted with standard 15 mm connector.
- Clear PVC tube with X-ray detective line and visible markings for easy observation.
- Murphy Eye smoothly formed to allow ventilation in the event of obstruction of the end of the tube during intubation.
- Sterile / Disposable / individual packed.
- Size : 2 2.5 3 3.5 4 4.5 5 5.5 6 6.5 7 7.5 8 8.5 9 9.5 10

NASAL OXYGEN CATHETER

FF-NOC-607

- Suitable for easy and efficient administration of oxygen via nasopharyngeal route.
- Soft and smooth open distal end with multiple lateral eyes for even dispersion of oxygen.
- Funnel connector at proximal end.
- Colour coded by size for easy identification.
- Sterile / Disposable / Individual packed.
- Length : 40 cms.

8 10 12 14 16 18 20

ANAESTHESIA & RESPIRATORY CARE

OXYGEN MASK

FF-OXY-605

- Specially designed for convenient oxygen therapy.

NEBULIZER KIT

FF-NB-604

- Consist of face mask with an specially designed nebulizer chamber for nebulizing patients.
- Nebulizer chamber capacity 5 / 6 / 7 cc.
- Swivel connector for convenience of attachment to the oxygen tube.

HIGH CONCENTRATION MASK

(OXYGEN MASK WITH RESERVIOR BAG)

FF-HCM-817

GENERAL FEATURE

- Soft, clear, Large anatomical mask for patient comfort.
- Adjustment elastic strap and clip for proper positioning of mask.
- Provided with 210 cm long multichannel tube to ensure continuous flow of oxygen even if tube accidentally kinked.
- Proximal end of tube is fitted with soft funnel shape connector for easy connection to oxygen source.
- Size : Adult and Paediatrics.
- Sterile / Disposable / Individually packed.
- High concentration oxygen mask with tubing is intended to supply oxygen or other gases to an individual for oxygen therapy and the reservoir bag is able to avoid rebreathing.
- Made from Non-toxic medical grade PVC 100% Latex free.
- Comes with 1 Ltr. Reservoir bag.

VENTURI MASK

FF-VM-836

- Allow accurate administration of a variety of oxygen concentrations.
- Non-toxic PVC colour coded kit for ease of use and delivery of variable concentrations of oxygen.
- Six colour diluters for six concentrations : 24%, 28%, 31%, 35%, 40%, 50%
- Adaptor for high humidity.

SINGLE DIAL VENTURI MASK

FF-VM-865

- Designed for the fixed and accurate administration of a variety of oxygen concentrations to the patients.
- Two oxygen diluters one for lower concentration of 24%, 26%, 28%, 30% (white color) and the other for higher concentration of 35%, 40%, 50% (Green color) for adjusting oxygen flow rate.

ANAESTHESIA & RESPIRATORY CARE

CATHETER MOUNT

FF-CM-819

- Designed for delivery of oxygen or gases to the patient and can be connected with ET tube for respiration.
- Catheter mouth 22 mm standard female connector compatible with all breathing and ventilator circuits.
- Specially designed port at the elbow.
- Corrugated tubing manufactured from antistatic EVA.
- E.T.O. Sterile and pyrogen free.

OPTION AVAILABLE

- Catheter mount standard swivel mouth with double swivel elbow.
- Swivel mount with port elbow.
- Swivel mount with plain elbow.
- Straight catheter mount with 22F.
- Swivel mount with 15m.
- Catheter mount expandable Swivel mount with double seal cap.

T - OXYGENATOR

FF-TO-820

- T-Oxygenator helps weaning patient from ventilator. It oxygenates patient on endotracheal tube or tracheostomy tube.
- It allows doctor to assess about removal of endotracheal tube or TT.
- For long term Tracheotomy patient with oxygen requirement this device works well.
- There is suction port by which secretions can be extracted without removal or T from tube thus preventing infection.

BAINS CIRCUIT

FF-BHV-821 Adult
FF-BHV-867 Child

- Bains Circuit offered comprises co-axial modification of basic T-piece system which has been developed for facilitating scavenging of waste aesthetic gases.
- As a tube carrying fresh gas, it travels inside outer reservoir tube to endotracheal tube connector.
- Bains circuit is made from corrugated tube of 22 mm diameter with expiratory valve connecting tube and 2 liter reservoir bag.
- Sterile / Non Sterile / Individual packed.

VENTILATOR BREATHING CIRCUIT

VC-822 Plain Circuit
VC-823 With Single Water Trap
VC-824 With Double Water Trap

- Medical Grade corrugated PVC ventilator tube circuit can be ported for temperature and capnography circuit is provided with a recessed standard 22 mm male / male & 22 mm male / female adaptor for flexibility throughout the critical care management.
- The unique water trapper offers excellent drainage and ideal positioning to maximize moisture collection.
- The circuit uses standard connector that is simple convenience in clinic.
- Sterile / Disposable / Individual packed.
- Size : Adult / Pediatric
- With or Without port.

ANAESTHESIA & RESPIRATORY CARE

RESPIRATORY EXERCISER

FF-BS-828 3 BALL SPIROMETER

- Restores and maintains lung capacity in post operative ambulatory and COPD patients.
- Sustained deep breathing has been shown to relieve anxiety and fight stress.
- Helps to develop, improve and maintain respiratory fitness.
- A transparent well calibrated chamber with single bell or color coded triple balls allows visual calibration and estimation of the patient's progress.
- Air filter for enhanced protection.
- Sterile / Disposable / Individual printed box packing.

FF-BS-864 SINGLE BALL SPIROMETER

BREATHING FILTER

FF-BF-826

- Medical filter are used for the removal of bacteria from the air breathed in by the patient from the environment through respiratory support equipment. such filter in the airway between equipment and patient.
- Breathing filter utilized hydrophobic membrane and synthetic media that provide barrier and electrostatic filtration with bacteria and vital removal efficiency higher than 99.99% accomplished with extremely low resistance to air flow. The HME keeps moisture retention and warming of inhaled air filter design in different size with CO² monitoring port and facilitate use one wider range of patients.

PRODUCT FEATURE:

- Clear housing, Low flow resistance high filtration efficiency, High Heat & Humidity level, CO₂ monitoring port, Sterile package.
- Size : Adult / Pediatric.
- Sterile / Disposable / Individual packed.
- Type available : BVF, HME, BVF-HME

REBREATHING BAG

FF-RB-840

- Rebreathing bag made from Medical grade Latex Rubber with 22 mm I.D. Connector.
- Size : 0.5, 1, 1.5, 2
- Available Color : ● ● ●

J R (JACKSON REES) CIRCUIT

FF-JR-837

- J R Circuit is made from corrugated tube of 22 mm diameter with expiratory valve connecting tube and 2 liter reservoir bag.

LIMB O VENT CIRCUIT

FF-LVC-875

ANAESTHESIA & RESPIRATORY CARE

NEBULIZER WITH T PCS

FF-NB-606

- Nebulizer with T pcs is simple to use.
- It is quick to assemble facilitates fast nebulisation.
- It is available with or without mask and can be used with mask, iGel, LMA and ET Tube.
- Provided Swivel connector and T pcs for convenience of attachment to the oxygen tube.
- Available with star lumen 210 cm long multichannel tube to ensure continuous flow of oxygen even if tube is accidentally kinked.
- Proximal end of tube is fitted with soft funnel shape connector for easy connection to oxygen source.
- Sterile / Disposable / Individually packed.

GUEDEL AIRWAY

FF-GA-816

- Specially designed to maintain an unobstructed oropharyngeal airway during general anaesthesia and in unconscious patients for other reason.
- A traumatic soft rounded edge.
- Integral color coded hard bite block to prevent biting or tongue and airway occlusion.
- Size : 000, 00, 0, 1, 2, 3, 4, 5.

NASOPHARYNGEAL AIRWAY

FF-NA-868

- Size: 6, 7, 8.

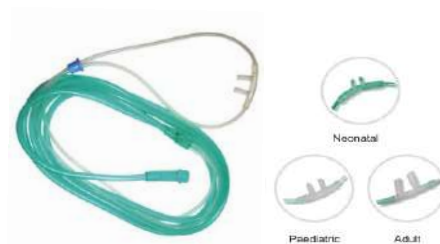

BIPAP MASK

FF-BM-869

TWIN BORE NASAL OXYGEN SET

(NASAL PRONG OR NASAL CANNULA) FF-NC-818

- Designed for easy and efficient administration of oxygen manufactured from Soft, Non-toxic, Non Irritant PVC even in long term use.
- Soft twin prong nasal tips to ensure equal volume of oxygen to both air passages for maximum patient comfort.
- Smoothly finished and adjustable nasal tips for maximum patient's comfort.
- Star lumen tube ensures the supply of oxygen even if tube is accidentally kinked.
- Soft funnel shaped connector facilitates easy connection to oxygen source.
- Tube Length : 200 cms.
- Size : Adult, Pediatric & Neonatal.
- EO Sterile / Disposable / Individual packed.

LARYNGEAL MASK AIRWAY

FF-LM-870

ANAESTHESIA & RESPIRATORY CARE

AIR CUSHION MASK

FF-ACM-866

- Air filled cushion to provide safety and comfortable use.
- Suitable for use in respiratory care anesthesia and resuscitator.
- Body with antistatic property.
- Good grip.
- Material : Silicon
- Size : 0, 1, 2, 3, 4, 5.

RESUSCITATION BAG

(AMBU BAG)

FF-AB-829 Infant
FF-AB-830 Pediatric
FF-AB-831 Adult

- Silicon resucation bag is available with standard elbow E-type valve. Oxygen connecting tube and reservoir bag.
- These bags are respiration device used to provide positive pressure for manual ventilation needed when a patient lacks respiratory drive during resuscitation involving oxygen.
- Size Adult, Pediatric, Infant.

NEONATAL HEATED WIRE CIRCUIT

VERSAMED VENTILATOR CIRCUIT

SURGERY & WOUND CARE

YANKAUER SUCTION SET

FF-YSC-825

- Transparent molded Yankaur suction handle attached with 2.5 mtr long Non-toxic, Medical grade PVC tubing suitable for easy attachment to any type of suction apparatus.
- A port is provided at the distal end of handle for finger tip / thumb control facility during suction management.
- Yankaur handle is open with four lateral eyes to withstand negative pressure and ensure continuous and easy suction.
- Sterile / Disposable / Individual packed.

ABDOMINAL DRAINAGE KIT

FF-ADK-836

- Manufactured from Non-toxic, Non irritant Medical grade PVC.
- Intended for the use in post operative drainage from abdominal areas.
- Soft and smooth abdominal drainage catheter with Radio opaque line, large atraumatic eyes for efficient drainage and collection bag of capacity 2000 ml.
- Specially designed handle holds tube up right position and facilitates carrying.
- Sterile / Disposable / Individual packed.
- Size : (16) (18) (20) (22) (24) (26) (28) (30) (32) (34) (36) (38) (40)

CHEST DRAINAGE CATHETER

FF-CDC-834

- Suitable for post operative drainage after cardio thoracic and thoracic surgery.
- Proximal end is fitted with tapered connector for easy and non-traumatic insertion.
- Provided with radio opaque line and marking at every 2 cms. from the last eye to ascertain the depth of placement.
- Large smooth drainage eyes for efficient drainage.
- Sterile / Disposable / Individual packed.
- Size : (16) (18) (20) (22) (24) (26) (28) (30) (32) (34) (36) (38) (40)

CLOSE WOUND SUCTION UNIT

FF-CWS-871

- For close wound under negative pressure post operatively with option to use one or two catheter simultaneously.
- Available in different sizes with matching size curved needle to meet moderate to heavy drainage needs.
- Units consists of below unit with connector connecting tube with clamp and "Y" connector. Curved needle with matching size catheter, spare perforated redon drain catheter.
- Collapsible bottle is available in 400 ml and 800 ml.
- Size : (10) (12) (14) (16) (18)

MINI CLOSE WOUND SUCTION UNIT

FF-CWS-873

- Designed for wound drainage under negative pressure for minor surgery and plastic surgery.
- units consists of bellow container with capacity 80 ml curved needle with matching size catheter.
- Size : (6) (8)

CORRUGATED DRAIN SHEET

FF-CD-842

- Extra sft super smooth PVC corrugated sheet for wound drainage.
- E.T.O. Sterile and Pyrogen free.

MISCELLANEOUS RANGE

INFANT MUCUS EXTRACTOR

FF-ME-601

- Specially designed for aspiration of secretion from oropharynx in newly born babies to ensure free aspiration.
- Convenient to extract mucus specimen for micro biological examination.
- Spare plug cap is provided for sealing and storage of specimen.
- Low friction surface catheter is provided with open end silk smooth round tip for trauma free insertion.
- Also available with bacterial barrier filter at suction end.
- Capacity : 20 - 25 ml.
- Sterile / Disposable / Individually Poly or Paper packed.

KARMAN CANNULA

FF-KC-835

- Specially designed for aseptic medical termination of pregnancy.
- Suitable for use with MTP syringe or Suction apparatus.
- Universal adaptor is used for connecting to suction apparatus.
- Distal end is coned with two large lateral eyes to facilitates the curette.
- Sterile / Disposable / Individually Poly or Paper packed.
- Available without adaptor.

UMBILICAL CATHETER

FF-UC-506

- Manufactured from soft PVC white yield easily to tissue contours at body temperature.
- Designed for intermittent or continuous access to the umbilical artery or vein of newly born or premature infants.
- Tube with radio-opaque line marked at every cm from the open distal end to ascertain the depth of placement.
- Individually straight packed in paper pouch packing to ensure aseptic handling.
- Sterile / Disposable / Individually packed.
- Tube length 40 cm.
- Size : 5 6 8

UMBILICAL CORD CLAMP

FF-CC-500-501-502

- Manufactured from Non-toxic Medical grade polymer.
- Designed for clamping the umbilical cord immediately after birth.
- Provided with security lock click to prevent accidental re-opening.
- Finger grip ensure safe and convenient handling, particularly when gloves are wet.
- Provided with grooves all along the length to prevent the slipping of the umbilical cord and to retain it in the same position.
- Sterile / Disposable / Individually Poly or Paper or Blister packed.

BLOOD LANCET

FF-BL-872

- The blood lancet that we manufactured is individually packed and is sterile.
- The point of the needle is very sharp and allows easy penetration in the body thereby minimizing patient trauma.
- The needle offers fine grip and can be easily disposed off.

ALCOHOL SWAB

FF-AS-874

- Alcohol swabs that are saturated with isopropyl alcohol.
- It providing maximum hygiene to the patients.
- This products is extensively used in hospital and is packed by using material that helps in keeping the contents of the products and dose not let the alcohol dry.

TEST TUBE

FF-TT-833

- **K3 EDTA Tube 2 and 3 ml.**
- **Serum Tube (Plain and Clot activator) up to 4 ml.**
- **Fluoride Tube 2 ml.**
- **Lithium heparin tube 2 ml.**
- **Sodium heparin tube 2 ml.**
- **Sodium citrate (3.2 %) tube 2 ml (for PT)**
- **Sodium citrate (3.8 %) tube 2 ml (for ESR)**
- Packing : Poly Bag / Box / Thermocol Tray

MISCELLANEOUS RANGE

LATEX SURGICAL GLOVES PRE POWDERED

FF-SGL-801

- Intended to use in invasive surgery for protective covering for the hands from contamination.
- Made from special quality natural rubber latex.
- Lightly powdered with bio absorbable corn starch USP grade to prevent granulose.
- Anatomically shaped for better comfort and micro rough surface for better instrument grip.
- Offers superior barrier protection, precise dexterity, tactile sensitivity and flexibility.
- Extensively leached in lot flowing to reduce extractable protein and chemical residues.
- Bio burden and sterility tested.
- Size : (6) (6.5) (7) (7.5) (8) (8.5) (9)

LATEX SURGICAL GLOVES POWDERED FREE

FF-SGL-812

GYNECOLOGICAL ELBOW LENGTH GLOVES

- Powder free gloves are used to eliminate risk associated with glove powder.
- Powder free latex gloves are chlorinated or coated with unique blend of polymer to provide excellent dry and damp hand donning capabilities.
- Manufactured under Hygiene condition to minimize bio burden level.
- Sterilized by EO.
- Size : (6) (6.5) (7) (7.5) (8) (8.5) (9)

EXAMINATION GLOVES

EGL-802 Latex Gloves (Prepowdered / Polymer Coated / Chlorinated)

EGL-803 Nitrile Gloves

EGL-802 Vinyl Gloves

EXAMINATION VINYL GLOVES

EXAMINATION NITRILE GLOVES

- Light Purple
- Light Pink
- Dark Blue
- Light Green
- Dark Purple
- Light Blue

- Non finger fatigue, keep the hand cool and comfortable.
- Size : Small, Medium, Large, Ex-Large.
- Sterile / Disposable / Printed box packing.

MISCELLANEOUS RANGE

PREP RAZOR / SKIN BLADE

FF-SB-889

- Prep Razor / Skin Blade with Platinum edge blade mainly used by hospital before operation to remove unwanted hairs from the patient.
- Quality of blade is one of the best available in India.
- Prep Razor body is made for better grip of the user.

DISPOSABLE MASK

FF-DC-809 2 Ply Mask
FF-DC-810 3 Ply I

- Manufactured from soft Non-woven cloth.
- Double or triple layer Mask offering excellent bacterial filtration efficiency.
- Super smooth soft ultrasonically welded mask is not comfortable during use.
- Disposable Sterile & Non Sterile.
- Available in Ear loop and Tir-on type.

DISPOSABLE CAP

FF-DC-805

- Manufactured from soft Non-woven cloth.
- Specially designed to protect the paint against dropping of hair / dandruff of the doctor and other attending staff.
- Provided with stitched interlocking adaptable elastic for better grip on the forehead and comfortable fitting.
- Disposable Sterile & Non Sterile.
- Available Bouffant cap and Surgeon's caps.

HIV KIT

FF-HK-849

- Disposable Gown : 1 Pcs.
- Surgeon's Cap : 1 Pcs.
- Shoe Cover : 1 Pcs.
- Latex Gloves : 1 Pcs.
- Goggles : 1 Pcs.
- Face Mask : 1 Pcs.
- Sterile / Disposable / Individually Packed.

- Mayo Trolley Cover 1 Pcs.
- Yankauer Suction Set.

ORTHOPAEDIC RANGE

CANNULA FIXATOR

FF-ICF-927

- Semi Permeable adhesive dressing B.P.
- Cannula fixer elastic bandage dressing designed to secure the catheter in challenging I.V. application.
- 'U' shaped design to secure the IV cannula in place.
- Stick well, yet remove easily.
- Sterile / Disposable / Individual Packed / Printing Box

PLASTER OF PARIS BANDAGE

FF-PPB-901, 902

- Plaster of Paris Bandage is widely used in orthopaedic segment for rectifying the bone damage and dislocation.
- These bandages are offered in specific length of 2.7 meter. Further we supply these products in diverse size and length as per the clients specifications.
- Plaster of Paris Bandage have a high cast strength and optimum setting time.
- The bandage is extra durable extra creamy and minimum powder loss.

COTTON CREPE BANDAGE

FF-CCB-913, 914, 915, 916

- Manufactured using thick fabric.
- These bandages have several features such as woven fast edges better elasticity controlled uniform and smooth pressure.
- These bandages help in allowing normal skin breathing as they do not hamper joint and muscular flexibility.
- In order to restore the elasticity of these bandages and enhance their function life one should wash them in warm soapy water then rinse thoroughly in fresh water of tap then squeeze them gently and allow them to get dry without much stretching.
- These are available in various width and that stretched to the length of 4 mtr.

ELASTIC ADHESIVE BANDAGE

FF-EB-921, 922, 923

- Elastic adhesive bandage is a light weight strapping bandage that can be use for ankle taping knee taping, hand taping and wrist taping. It is applied when moderate to maximum strength is necessary.
- It is a heavy duty elastic adhesive bandage with aggressive adhesion.
- Its soft cotton has very good conform ability.
- Elastic adhesive bandage is strong and reliable stickiness.
- It leaves no residue on body parts.
- color thread in the middle of the bandage facilitating overlapping.

ADHESIVE TAPE

FF-AT-907, 908, 909, 910

- Adhesive tapes are manufactured using high grade raw material.
- These tapes are extensively used for diverse commercial and household use.
- Available in various sizes.

ROLLER BANDAGE

FF-RB-917, 918, 919, 920

- Roller Bandages used in wound dressing.
- These roller bandages are odorless and absorbing moisture in good quality.
- for the convenience of our clients these roller bandages are individually packed in 10 rolls in a pack.

ORTHOPAEDIC RANGE

COMBINE DRESSING

FF-CD-905, 906

- Manufactured using highly absorbent cotton.
- the Non-woven facing and highly absorbent cotton filler having rayon fibers allow liquid to diffuse. Throughout the combine pad.
- Hydrophobic backing prevents the strike through.
- Sterilized by E.T.O.

ABSORBENT COTTON WOOL

FF-ACW-956

- Absorbent cotton wool is Fabricated using 100 cotton.
- The absorbent cotton wool is absolutely free from naps, leaf, shell and seeds.
- To ensure the best quality of these wools they are bleached to a good white and hence offer and excellent absorbency.
- These cotton wools are convenient for cleaning and swabbing various type of wounds and can be as a medicaments to wounds.
- A part form this we also provide a quality packaging to these wools as per the specific requirement of the clients.
- Size : 50, 100, 200, 400, 500 gms.
- Also available Zingzag cotton.

GAMJEE ROLL

FF-GR-911, 912

- Gamjee roll made from superior cotton yarn.
- It's absorption rate faster (less than 10 seconds) and has a better tending capacity and less allegiance to heading tissue.
- It is used for swabbing and cleaning wounds and also applied over the dressing to hold the bandaging point.

ORTHOPEDIC BANDAGE

FF-OB-903, 904

ABSORBENT GAUZE SWABS

FF-AGS-957

PARAFFIN GAUZE DRESSING

FF-PGD-958

CHLORHEXIDINE GAUZE DRESSING

FF-CGD-959

BODY BELT & BRACES

WRIST & FOREARM SPLINT

FF-WAS-936

- Easily shaped contoured palmer stay for immobilisation.
- Overall length 8" (20.3 cms) length.
- Left or right sided.

WRIST STRAP

FF-WS-935

- Strong elastic provides support and compression.
- Keep the fingers and thumb in functional position.
- Touch and Close fastening.

TENNIS ELBOW

FF-TE-938

- Padded band places pressure directly on to the inflamed tendon.
- Reversible buckle mechanism.
- Durable, Comfortable material provides lasting wear.

LONG KNEE BRACE

FF-LKB-925

- 20" long anatomical shaped brace for stabilize Knee.
- Posterior aluminum stays provided better immobilization Elastic strap help easy to wear and secured fitting.
- Available Size : **S, M, L, XL, XXL**

SHORT KNEE BRACE

FF-SKB-962

- 14" long anatomical shaped brace. Aluminum support stays..
- 6" elastic patellar strap for hold the patella in position.
- Velcro closure for secure fit.
- Available Size : **S, M, L, XL, XXL**

KNEE CAP

FF-KC-951

- Anatomically designed for better fit.
- Double layer long type knee cap is increase therapeutic warmth and quicker healing.
- Heat resistant type rubber and good quality yarn are enhances knee cap life after prolonged use.
- Available Size : **S, M, L, XL, XXL**

HINGED KNEE CAP

FF-HKC-963

- Fabric provides compression and warmth.
- Polycentric hinges that provide medical and lateral knee support and stabilisation Velcro closure for secure fit.
- Available Size : **S, M, L, XL, XXL**

ANKLE TRACTION

FF-AT-932

- PUF padded brace increase patient comfort.
- Non adhesive type offer easy to use and less chance to allergic.
- Multiple fasteners provide free to loosen and frequently tighten.
- Available Size : **S, M, L, XL, XXL**

ANKLE BINDER

FF-AB-940

- Figure of 8 pattern design for fine stability.
- High strength elastic provide good compression.

BODY BELT & BRACES

LUMBER SACRAL BELT

FF-LS-924

- Contoured design for protect fitting.
- PUF padded for patient comfort.
- Malleable rigid back support for lumbersacral region.
- High strength elastic offer better compression.
- Board hook and loop panel give flexibility in size.
- Available Size : **S, M, L, XL, XXL**

CHEST BELT

FF-CB-961

- User friendly 9" elastic grip.
- 4" x 11" PUF sternum pad for patient comfort.
- Velcro panel closure for better adjustment.
- Available Size : **S, M, L, XL, XXL**

RIB BELT

FF-RB-926

- Available in 6" and 9" width elastic.
- Ethafoam padded for bettr comfort.
- Design efficient to hold rib cage.
- Available Size : **S, M, L, XL, XXL, Universal.**

ABDOMINAL BELT

FF-AB-941, 943

- Curved flap give proper support to hanging abdomen.
- Availabe in 6" and 9" width elastic.
- Available Size : **S, M, L, XL, XXL.**

CERVICAL COLLAR

FF-CC-944

- Made with high GSM stockinet which is very dermophillic.
- Loop contact closure for easier use.
- High density PU foam provide good support better immobilization and patient comfort.
- Available Size : **S, M, L, XL.**

HARD CERVICAL COLLAR

FF-HCC-935

- Two part ventilated polyethylene for rigid support and durability of collar.
- Height adjustable for personalized fitting. Secure velcro strapping.
- Padded border with vinyl leather covering for increased comfort.
- Available Size : **S, M, L, XL.**

ARM SLING

FF-AS-928

- Designed to support the arm.
- Easy to apply with tough and close fastening.
- Thumb loop limits wrist drop and adds patients comfort.
- Ethafoam shoulder pad.
- Available Size : **S, M, L, XL, XXL.**

CLAVICAL BRACE

FF-CB-931

- Square type back panel for greater support.
- Figure of eight pattern desing give superior compression.
- Foam padded clavicle and shoulder strap for patient comfort.
- Available Size : **S, M, L, XL, XXL, Universal.**

SHOULDER IMMOBILIZER

FF-SI-929

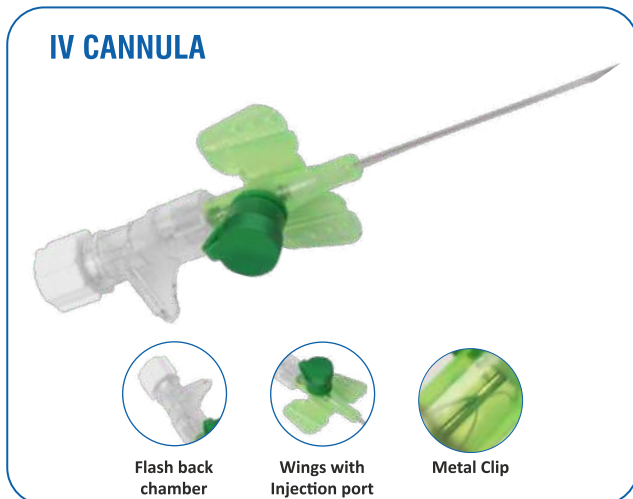

- Designed to immobilise the arm and shoulder.
- Two piece design easy to apply.
- Body strap helps control rotation.
- Available Size : **S, M, L, XL, XXL, Universal.**

INFUSION THERAPY

Infusion therapy involves the administration of medication through a needle or catheter. It is prescribed when a patient's condition is so severe that it cannot be treated effectively by oral medications, the medications are introduced to the vein through a catheter. Diseases commonly requiring infusion therapy include infections that are unresponsive to oral antibiotics, cancer and cancer-related pain, dehydration, gastrointestinal diseases or disorders which prevent normal functioning of the gastrointestinal system, and more.

We provide a complete array of the products that aid in Infusion Therapy. These products help in making IV therapy more convenient and safer for the healthcare providers and less painful for the patients. Our entire product range is CE certified and complies with International Quality Standards.

Product Features

- Bevel type needle for easier less traumatic insert.
- FEP catheter with X- Ray opaque line.
- Special Flexible and kink resistant catheter is double tapered With rounded tip for smooth introduction and minimum Discomfort to the patient.
- Injection port with non return silicon valve and color coded cap For intermittent and safe administration of drugs During infusion.
- Flexible wings provide easy and secure fixation and also Prevent skin contact with luer lock connector.
- High transparent flash back chamber for an easy view Of returning blood.
- Blood stopper
- Luer lock cap for closing the proximal end of the catheter After

Option Available:

- With Injection Port & Wings
- FEP Clear Catheter
- FEP Radio opaque Catheter
- PTFE Catheter & PU Catheter

- For multiple infusions
360° rotation
• Rotating male luer
• and two female luer connectors
- For multiple infusions
360° rotation
• Handle colour
• Light Blue
- Three Way Stop Cock
Lipid Resistant with
45° Click

Common Features

- Crystal clear transparent channel
- Minimum priming volume required for accurate drug administration
- Rotating male luer and two female luer connectors
- Arrow indication on the handle to indicate the direction of flow
- Connection meets 6% taper requirement to ensure leakage free fitment
- For pressure up to 4.5 bar (65 psi)

INFUSION THERAPY

IV INFUSION SET (VENTED/NON VENTED)

Product Features

- Sharp piercing spike for easy insertion in I.V container.
- Manufactured from non-toxic and transparent material.
- Infusion set with built in air vent and bacteria barrier hydrophobic filter.
- Specially designed transparent cylindrical collapsible drip chamber to visualize the flow rate.
- Disc type 15µm fluid filter at the bottom of drip chamber filters any particulate matter in the I.V fluid.
- 150 cm long super smooth kink resistant tubing.
- Efficient roller controller ensures better flow control.
- Provided with super smooth kink resistant tube for unobstructed flow.
- Fixed Luer lock for secure connection to all standard devices.

STERILE EO

Packaging

- individually packed
- 600 Pcs / Carton

MV SET 100/110/150 ml

Product Features

- Cylinder, flexible, clear and calibrated measured volume chamber in size 100/110/150ml.
- Chamber has an in built Injection port and air inlet with bacteria filter.
- Burette chamber is made of bio-compatible medical grade transparent styrene polymer, suitable for infusing all types of fluids.
- Unique floating auto shut off valve acts as a floating indicator and automatically shuts off the drain path to prevent the passage of air in the line.
- 15 micron fluid filter in the drip chamber.
- Equipped with a micro drip with reduced drop size of 60 drops/ml. Soft and kink resistant PVC tube, 150 cm long.

STERILE EO

Packaging

- individually packed
- 120 Pcs / Carton

Option Available

- Choice of Latex flush bulb
- "Y" injection port
- Latex free.

INFUSION THERAPY

CANNULA FIXATOR

Product Features

- Transparent and water resistant 2mm to cover and protect I.V. infusion sites providing visibility
- Recording label provided to record the date of application
- Provides secure adhesion, gentle to the patient's skin
- Helps in preventing infection, as provides a barrier to external contaminants

SCALP VEIN SET

3 WAY WITH EXTENSION / PRESSURE MONITORING LINES

Product Features

- Made from non-toxic medical grade PVC compound
- Individually pressure tested
- Available in assorted length
- 100% Leak proof and no blockage
- Soft Clear Flexible DEHP Free PVC Tubing
- Sterile, Non-Toxic and Pyrogen free.
- Sterilized by E.O. (Ethylene Oxide) Gas.

Option Available:

with Precision Flow Controller or 3 Way Stopcock.

HYPODERMIC SYRINGE

The word 'Hypodermic' is a medical term that refers to anything below the skin. Case in point, Hypodermic Syringes are syringes with a hollow needle that pierces the skin and injects medicaments into the bloodstream. Likewise, these syringes can also be used to extract blood from the human body. We offer multiple varieties of Hypodermic Syringes.

The Single-use Hypodermic Syringes are one of the most in- demand single-use syringes in the Indian market.

Luer slip tip

Our luer slip tip provides a friction-fit connection that requires you to push and twist the syringe tip into the needle hub.

Product Features

- High clarity transparent barrel molded by using premium quality medical grade polypropylene.
- Thermo Plastic Elastomer (TPE) Gasket for smooth movement of the plunger.
- Needles are manufactured by using imported Cannula with precise tip sharpness and strong bonding strength with the hub.
- Needles have an ultra-thin wall permitting rapid and efficient drug delivery.

HYPODERMIC NEEDLE

A Hypodermic (hypo – under, dermic – the skin) needle commonly used with a syringe to inject medicaments into the body or extract fluids from it. We at Nubeno manufacture a variety of high precision Hypodermic Needles designed to offer maximum protection and uplifting results during medical operations. These needles are manufactured keeping in mind the mandates of global industry standards.

HYPODERMIC NEEDLE

Product Features

- Extra thin wall
- Cannula made from imported cold-rolled stainless steel strips in-house
- The tip of needles are grounded using high-precision CNC machines by skilled operators
- Siliconized to minimise drag during penetration and withdrawal
- Vision Camera check for burs, hook and blockage; ensures 100% automated quality control enabling superior sharpness to minimise pain
- Assembled and packaged on totally automated machines

ANAESTHESIA

The process of Anaesthesia is extremely crucial to operate on the patients. If not done accurately and in right moderation it could be hazardous to the patients. The Anaesthetic machines dispense gases which are a combination of various vapours in varying proportions depending on the time expected for the surgery. Anaesthesia is given to control the consciousness and analgesia of the patients during the medical procedures. The machine performs vital tasks such as accurately mixing anaesthetic gases and vapours, enabling patient ventilation, providing oxygen, as well as minimizing anaesthesia-related risks to patients and staff.

We ensure that no failure is experienced because of the fault in the machine by pre-use checks and regular maintenance.

ENDO TRACHEAL TUBE WITH CUFFED

Product Features

- Non-return valve with indicator facilitate the cuff inflation and deflation
- Thin, smooth cuff inflates symmetrically eliminating any risk of herniation
- Terminal end is suitable for 15mm connector
- Individual Packing in Blister Pack

ENDO TRACHEAL TUBE WITHOUT CUFFED

Product Features

- Pilot balloon with integral one way valve
- Size of the tube clearly marked on the tube
- Cuff is optimally designed for routine intubation
- One way valve for efficient and easy inflation and deflation of cuff
- Murphy eye, high volume, low pressure cuff, oral/nasal

Technical Specification

Size	2.0mm to 10.0mm

ANAESTHESIA

YANKAUER TUBE 210, 250CM

Product Features

- Yankauer set is a suction instrument used for the removal of secretion, blood & body fluids during surgery.
- Large lumen in handle provide rapid aspiration & resist clogging.
- Handle provided with side eyes to reduce the chance of tissue grab.
- Available with universal connectors to connect with suction pump line at proximal end and at distal end to be connected with Yankauer handle.
- Rigid transparent/translucent suction handle with Crown/Plain tip with or without thumb control.
- Soft & kink resistance two meter long ribbed PVC tubing withstands the suction pressure. Also available in 250cm, 300cm, 400cm & 500cm.
- Sterile/Non-Pyrogenic/Single use

RESPIRATORY CARE

The Gastroenterology division of health care and medical facilities focuses on the diseases of the stomach, oesophagus, small intestine, pancreas, gallbladder, bile, ducts and liver, colon and rectum. It comprises of a detailed considerate physiology of the gastrointestinal organs including the function of the liver as a digestive organ, the digestion and absorption of nutrients into the body and removal of waste from the system. It also includes colon polyps and cancer, hepatitis, gastroesophageal reflux (heartburn), peptic ulcer disease, colitis, gallbladder, Irritable Bowel Syndrome (IBS), and pancreatitis. And biliary tract disease, nutritional problems,

Stomach related diseases are probably one of the most common all around the world. And as because stomach function basically affects all parts of the body and they are so many components in it, it is really of utmost importance to have a proper diagnosis and treatment of the diseases. We provide numerous equipments to aid in the diagnosis and treatment procedure of the gastroenterology related diseases such as Ryle's Tube, Levin's Tube, Umbilical Catheter, and Infant Feeding Tube amongst others.

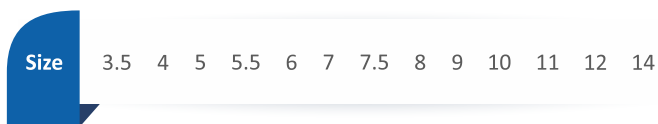

INFANT FEEDING TUBE

Product Features

- Designed for tiny infant and neonate for feeding.
- Made from implantation-tested PVC, non irritant to delicate mucous membranes
- Super smooth coned tip having two lateral eyes at distal end.
- Color coded female luer mount provided for safe feeding with syringe or funnel.
- A radio opaque strip co-extruded as an integral part of the catheters wall.

Technical Specification

Packaging

- Poly Pack or Blister Pack
- Inner Bag or Inner Box

RYLE'S TUBE

Product Features

- Specially designed for patient undergoing long term gastro intestinal feeding, aspiration and intestinal secretion.
- Siliconized and smooth outer surface to reduce chances of tissue irritation. Thermo sensitive material softening with body temperature conforming to the shape of naso - gastrictract.
- Corrosion resistant stainless steel balls sealed at the distal end of tube for X-ray identification and for assisting the movement of tube during insertion.
- Provided with full length radio - opaque line for checking the tube placement.
- Provision of four lateral eyes for efficient aspiration.
- Marked with 1, 2, & 3 black circles at 500mm,600mm & 700mm for accurate placement
- Provided with soft tapered connector at the proximal end to fit easily with standard accessories.

UROLOGY

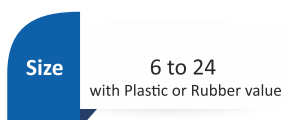

FOLEY BALLOON CATHETER

Product Features

- Latex, Siliconized
- Smooth tapered tip of catheter facilitates easy introducing into the urethra
- The drainage eyes are accurately formed to permit effective drainage
- The symmetrical balloon expands equally in all directions so as to Perform its function of retaining bladder efficiently
- The smooth outer surface is specially treated with medical grade silicone
- Fluid which facilitates easy passage through urethra
- Color Coded sleeves is useful for easy and rapid size identification

Technical Specification

Available Options:

- 100% silicon
- 2 Way / 3 Way
- Child / Adult Size

Packaging

- Poly Pack or Paper-Poly Pack

URINE COLLECTION BAG

Product Features

- 2000 ml Capacity
- Sterile, non-toxic and pyrogen free.

Models Available:

Top Outlet / Bottom Outlet / " T " Valve

Packaging

- Pack in Poly Pouch / Quantity per Box 200

RESPIRATORY CARE

Respiratory care unit is the department which includes treatment of the cardiopulmonary system. It includes diseases such as cancer of the lungs, asthma, bronchitis, pneumonia and other such cardiopulmonary diseases, infections and viruses. As such, the work often includes examining patients, performing chest exams, and analysing tissue specimens amongst many others.

As respiratory diseases are one of the most common diseases all around the world, especially with the high rise in air pollution, infection and diseases related to pulmonary canals are extremely common although really unfortunate. So, it is really integral to have the right equipment and accessories to treat the diseases or even diagnose it. Especially, when infants come into the picture. Diseases like pneumonia and asthma can be seen high on this age category. Nubeno is equipped with treating all these types of diseases in an appropriate way

NASAL OXYGEN CANNULA ADULT

NASAL OXYGEN CANNULA CHILD

Product Features

- Suitable for easy and efficient administration of oxygen
Star lumen Kink resistant main tube to avoid accidental blockage
- Soft twin prong nasal tips to ensure equal distribution of oxygen through both air passages which provides maximum patient comfort
- Tube length : 200 cm

Technical Specification

Size
Adult,
Paediatric &
Neonata

BLOOD MANAGEMENT SYSTEM

Blood collection or blood sampling is a crucial aspect in diagnosing various diseases. It not only helps in finding our information on the lack or excess of various elements in the body but also it is the initial step in diagnosing any disease in the body. The medical facilities and hospitals have various choice of blood collection systems. However, there are three major ways through which blood collection is done from the patients, amongst which, Venepunctures is one of the most routinely performed procedures. Evacuated tubes, Multi sample needles, Needle Holder are some of the equipments used in blood collection system.

We at Nubeno offer the range of products which are required in Pre-Analytical Phase of Blood Collection. The products are most important and regularly used equipments in any medical facilities.

BLOOD TRANSFUSION SET

Product Features

- For transfusion of blood or blood components
- Transparent & flexible drip chamber
- Approximately 20 drops/ml
- Soft and kink resistant PVC tubing With 200 micron blood filter
- Light weight ball facilitates Auto shut mechanism
- Available with priming filter
- DEHP Free

Option Available :

Vented / Non- Vented / With "Y" Connect

STERILE EO

Packaging

- Customization available

BLOOD TRANSFUSION SET

MISCELLANEOUS

UMBILICAL CORD CLAMP REGULAR

Product Features

- Designed for clamping Umbilical Cord immediately after birth.
- Provided with non-reopenable locks to avoid any accidental opening of clamp.
- Provided with secure and leak proof jaws to ensure proper clamping

Options Available :

Blue - Regular / Re-Openable

Packaging

- Customization available

MUCUS EXTRACTOR

Product Features

- For aspiration of secretion from oropharynx to ensure free respiration in newly born babies
- Separate screw top lid for safe sealing and handling of aspirate
- Soft, frosted & kink resistant DEHP free PVC tubing
- Also available with thumb control suction catheter
- Available in following capacity : 25 ml, 40ml, 100ml, 175ml
- Suction Tube lengths available: 40 & 50 cm
- Suction Tube sizes: From 6FG to 14FG
